

CRITICAL INFRASTRUCTURE SAFETY & SECURITY

 **NiDAR™**

360° AIR, SURFACE & UNDERWATER PROTECTION

NIDAR PROTECTS CRITICAL INFRASTRUCTURE BY BUILDING A LONG-RANGE 360° SITUATIONAL AWARENESS PICTURE AND PERIMETER SECURITY SHIELD AROUND THE ASSET.

Operating autonomously and discreetly 24/7, NiDAR can automatically monitor, detect, track, classify and respond to multiple objects in the air, on the surface and underwater as required.

Smart software algorithms developed by MARSS intelligently analyse and rank unknown objects to determine potential threat levels and trigger alerts.

Security vehicles, vessels and personnel can easily be located and monitored within NiDAR for added safety and security.

NiDAR supports decision makers by linking multiple onboard sensors, improving the detection and tracking of objects around the asset, increasing reaction time, reducing workload and minimising false alarms.

The NiDAR system is modular, scaleable and fully customisable to a specific asset and the security requirements.

INTUITIVE COMMAND & CONTROL

The enhanced awareness picture created by NiDAR is clearly presented in real time through an intuitive touchscreen user interface.

Secure remote access available via smart mobile devices for crew & security teams, both onsite and offsite.

360° LONG RANGE SITUATIONAL AWARENESS & PERIMETER SECURITY

AIR DETECTION - UP TO 1KM

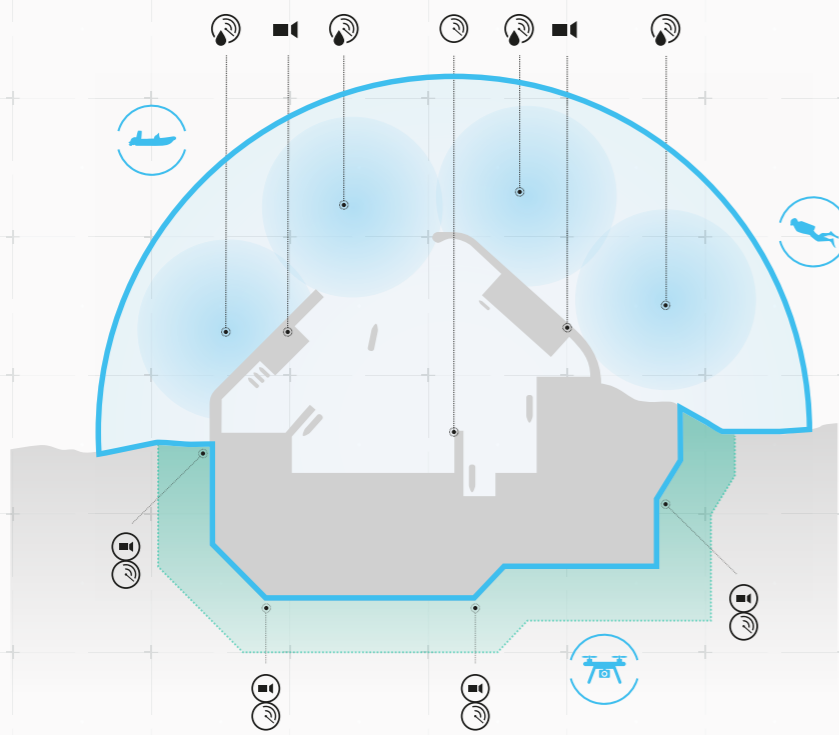

SURFACE DETECTION - UP TO 20KM

UNDERWATER DETECTION - UP TO 1KM

1. DETECT

INTEGRATION OF SENSOR & DATA FEEDS

NiDAR integrates sensors including cameras, radar, sonar plus AIS, VHF, tracker and transponder inputs to detect and monitor unknown and known air, surface and underwater objects.

Air detection ~ up to 1km
 Surface detection ~ up to 20km
 Underwater detection ~ up to 1km

2. CLASSIFY

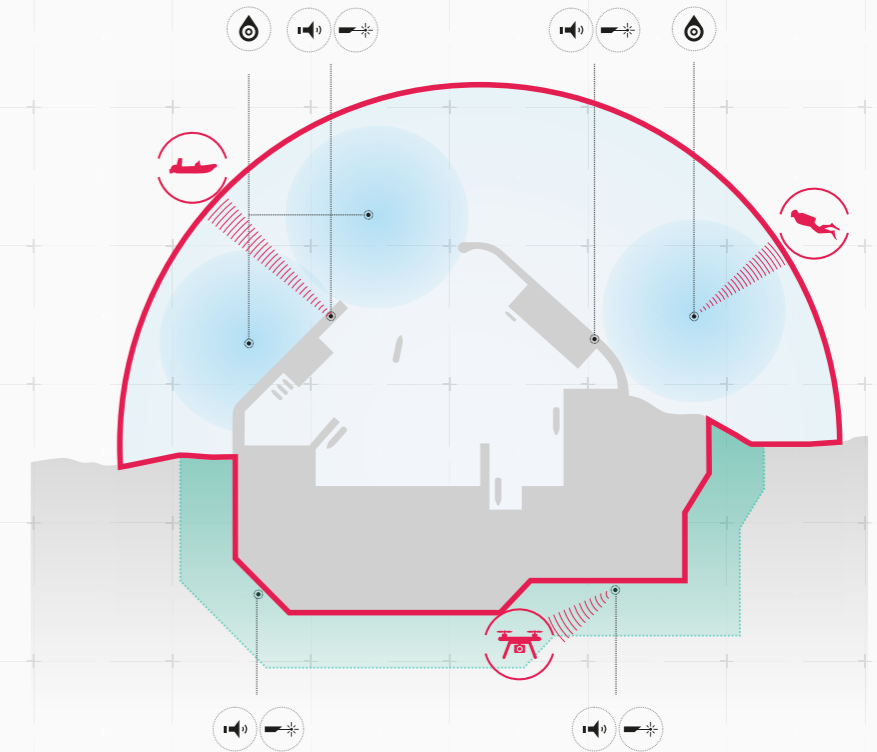

SMART SOFTWARE ANALYSIS & ALERTS

Advanced software algorithms classify unknown objects in the vicinity by analysing behavior patterns, shape, size, history and external factors such as weather and location.

NiDAR intelligently ranks potential threat levels, automatically activating smart alerts when user determined warning and alarm zones are breached.

3. RESPOND

DECISION SUPPORT & COUNTERMEASURES

Seamless automated tracking or manual control of cameras within NiDAR aids observation and decision making.

Automated or manual deployment of integrated countermeasures such as searchlights and loud-hailers deter potential approaches and de-escalate threats.

COMMAND & CONTROL (C2) INTERFACE

NIDAR PRESENTS A CLEAR AWARENESS PICTURE SUPPORTING DECISION MAKING VIA AN INTUITIVE TOUCHSCREEN USER INTERFACE

OVERVIEW
Satellite image and electronic map backdrop

REAL TIME TRACKING
Multiple (500+) known & unknown air, surface & underwater objects

MULTI-TOUCH CONTROL
Intuitive operation of cameras and deployment of countermeasures

ALARM ZONES
Customisable user defined warning and alarm zones around the asset

EVENT TIMELINES
Geo-located and time stamped data storage for playback and review

SMART ALERTS
Real time visual and sound alarms immediately notify crew and security teams

OBJECT DISPLAY
Live video feed and object speed, size, range, heading, risk level and AIS data

LIVE VIDEO FEEDS
Automated tracking of multiple objects & seamless handover between cameras

HARDWARE & SOFTWARE INTEGRATION

▶ SUMMARY

▶ INFRASTRUCTURE SAFETY & SECURITY PROTECTION

THE NIDAR SYSTEM IS MODULAR, SCALEABLE AND FULLY CUSTOMISABLE TO THE ASSET AND SECURITY REQUIREMENTS

SYSTEM

- LONG-RANGE 360° AWARENESS & PERIMETER SECURITY
- AIR, SURFACE & UNDERWATER PROTECTION AS REQUIRED
- INTEGRATION OF MULTIPLE DIFFERENT SENSORS & DATA INTO A SINGLE SYSTEM
- SMART ANALYSIS & CLASSIFICATION OF OBJECTS

USABILITY

- INTUITIVE MULTI-TOUCH COMMAND & CONTROL INTERFACE
- CUSTOMISABLE SURVEILLANCE & ALARM ZONES
- INTEGRATED BLUEFORCE TRACKING & PERSONNEL MONITORING
- AUTOMATED & MANUAL DEPLOYMENT OF COUNTERMEASURES
- SECURE REMOTE ACCESS VIA SMART MOBILE DEVICES

BENEFITS

- INCREASED DETECTION & REACTION TIME
- REDUCED WORKLOAD & LOW FALSE ALARMS
- EASE OF INSTALLATION WITH NEW OR EXISTING HARDWARE
- MINIMAL USER TRAINING & LOW MAINTENANCE
- GLOBAL AFTER-SALES SUPPORT

“OUR BRIEF TO MARSS WAS FOR THE MOST COMPLETE YACHT SECURITY PICTURE INCLUDING AUTOMATIC ‘360 DEGREE’ INTRUDER DETECTION PROVIDING OUR VESSEL WITH THE HIGHEST LEVEL OF PROTECTION.”

Chief Security Officer, 120m+ New Build Project
